Try our new 4K model for brighter colors, deeper contrast and sharper images.

- 
- All-in-One Solution
  - Easy Setup
  - White Glove Installation Available
  - 2.0" System Depth
  - Native HD and 4K Resolutions
  - Direct LCD Wall Replacement
-

Nanolumens' collaboration-ready display solution redefines simplicity in digital signage by merging the familiar sizing of traditional LCD video walls with the seamless performance of next-generation LED technology. Engineered for rapid deployment and intuitive operation, this All-in-One (AIO) system features a user-friendly interface that makes setup and collaboration quick and hassle-free. Built-in software supports wireless screen sharing, digital signage, and real-time collaboration—making it ideal for conference rooms, control centers, and interactive public spaces. Over-the-air (OTA) updates ensure the system remains current with evolving features and support.

## Why Nanolumens

At NanoLumens, we've set our sights — and our standards — high when it comes to LED and service. We leverage the best of technology to meet everyday needs and enable digital transformation. Our promise to you is an unsurpassed first and lasting experience.

## NIXEL™ to Pixel Warranty

Your display is engineered to pass the ultimate test: time. We use high-performing materials like gold wiring to ensure your display is a worthwhile investment. Our Warranty coverage starts pixel one ensuring your display is covered 100% from our Atlanta headquarters.
